

CMS Demo Evidence

Evidence artifacts supporting CMS Blue Button API production access review for Denali Health.

Date: 2026-04-10 **Prepared by:** Denali engineering team **Scope:** Security hardening session covering HIPAA audit logging, PHI logging hygiene, PWA offline data handling, legal document consistency, and operational metrics.

All artifacts are point-in-time snapshots captured on 2026-04-10. The underlying data is live and auditable in the production environment (AWS RDS `denali-prod` , CloudWatch `/ecs/denali` , GitHub `qashsolutions/denali`).

Contents

File	Description
01-audit-log-integrity.md	Production audit_logs schema verification: FK behavior, row count, retention guarantee
